

Harness the Power of GenAI with a New Math Data GenAI Assessment

Secure and Sustainable Solutions

Unlock the Power of AI for your business! New Math Data's specially trained AI model provides tailored solutions to meet your compliance needs. Our readiness assessment delivers a roadmap to high-level architecture, ensuring your organization stays ahead in today's fast-paced tech landscape. Embark on your AI adoption journey with guidance from our seasoned experts.

GenAI Readiness Assessment:

- Assess the organization's current state, and identify potential opportunities with GenAI tools to yield high-value transformative outcomes.
- Examine the implications of Generative AI and the potential effects this technology will have on the organization.
- Review existing data sources.
- Identify use cases for GenAI.
- Evaluate the current Data Governance environment.
- Analyze possible challenges along with key risks and limitations.
- Assess architectural solutions and perform roadmap planning.
- Develop high-level architecture and design for GenAI solutions.
- Identify appropriate AWS services and technologies.
- Determine the organization's readiness for change, including stakeholder buy-in, employee training.

Deliverables:

1. Report of findings: Strategic approach to GenAI.
2. Adoption roadmap.
3. Architecture design.
4. Deployment model plan.
5. TCO calculation estimate, including AWS consumption.
6. Statement of work for the proof of concept.

Over 30 years of experience in data science.
Data is all we do!
